PROFILE

Product Owner with about 6 years in B2B software (3.5 in product roles), building AI-powered products for banks. I own Selecta, an AI and predictive-analytics CRM used by 4+ banks, including tier-1 Serbian banks, and 500+ active users, from the first presales demo through contract, onboarding, UAT and documentation to escalations after go-live. I lead 3 Product Specialists daily, set priorities for 10+ engineers shipping every two weeks, and build parts of the product myself in SQL, Bold BI and n8n. Delivered for banks in Serbia, North Macedonia and the Middle East, and earlier as one of three Product Owners on a 50-person SAP Germany programme.

RESULTS

−67% SME loan approval time (60 → 20 days) · **~50%** less analyst time per AI credit assessment · **4+ banks**, 500+ active users · **1–3 months** from contract to go-live · **10+ engineers**, release every 2 weeks

EXPERIENCE

Intellya d.o.o., Belgrade — 10/2024 – Present

B2B SaaS · AI products for banks and financial institutions

Product Owner, Selecta (AI-powered CRM for banks) — 03/2026 – Present

- **Own the roadmap, backlog and success metrics for 4+ banks and 500+ active users:** lead presales demos, take signed clients through contract, onboarding, UAT and documentation to go-live, and own their escalations after launch.
- **Lead 3 Product Specialists daily and set priorities for 10+ engineers** shipping every 2 weeks, running sprint planning, refinement and retrospectives.
- **Build the product hands-on:** SQL on production data, Bold BI dashboards, and n8n and Claude Code workflows that became production features; I write the specs and test what engineers build.
- **Turn escalations and usage data into roadmap decisions,** fixing recurring problems at the root rather than one ticket at a time.
- Run implementations across Selecta's modules (operational, events and notifications, reporting, campaigns, retention, surveys, sales), turning client requirements into configuration, specs and acceptance tests.

Product Specialist — 10/2024 – 03/2026

- **Cut SME loan approval from 60 to 20 days (−67%)** by prioritising automation of manual credit-workflow steps with bank risk and credit teams.
- **Reduced analyst time per credit assessment by ~50%** by defining an AI feature that reads financial statements and buyer–seller ledgers and drafts the analysis for review.
- **Took new bank clients from contract to go-live in 1–3 months** by running onboarding and UAT and writing functional and technical documentation.

msg global solutions, Serbia — 12/2022 – 10/2024

SAP consulting · enterprise finance software

Product Owner, SAP Profitability & Performance Management — 05/2023 – 10/2024

- **Delivered the corporate direct tax module** on a flagship SAP Germany programme, as one of three Product Owners on a 50-person, globally distributed team.
- **Co-led the SAP SCT starter pack, reused in 3+ client implementations,** by standardising calculation logic into a reusable product.
- **Drove adoption across 100+ enterprise stakeholders** through demos, UAT and cross-workstream coordination.

IT Consulting Intern — 12/2022 – 05/2023

- Promoted to Product Owner within 6 months.

Sistem:i d.o.o., Belgrade 10/2020 – 12/2022

Sales Manager · Apple Solution Expert

- **Closed €200K+ in software sales to institutional clients,** owning the full cycle from solution demo to close.
