University of Belgrade (FON) • 10/2019 – 05/2021

Taught e-business and web development; ran Node.js and 3D-modelling workshops.

LANGUAGES

Serbian — Native

English — Full Professional

PROFILE

Product Owner with 3.5 years in product roles, building AI-powered software for banks. I own Selecta, an AI-powered CRM used by 4+ banks, including tier-1 Serbian banks, and 500+ active bank users, from the first presales demo through contract, onboarding, UAT and documentation to escalations after go-live. I lead a team of 3, set priorities for 10+ engineers, and build parts of the product myself in SQL, Bold BI and n8n. I shipped the AI credit workflow that cut SME loan approval from 60 days to 20.

PROFESSIONAL EXPERIENCE

Intellya d.o.o., Belgrade

10/2024 – Present

B2B SaaS • AI products for banks and financial institutions

Product Owner — Selecta (AI-powered CRM for banks)

03/2026 – Present

- Own Selecta across the full client lifecycle for 4+ banks and 500+ active users: I lead presales demos for prospective banks, then take signed clients through onboarding, UAT and documentation to go-live, and own their escalations after launch.
- Build the product hands-on, not only specify it: SQL, Bold BI dashboards, product configuration, and n8n and Claude Code workflows that became production features. I then write the specs and test what engineers build.
- Lead and coach a team of 3 Product Specialists day to day, and set priorities for 10+ engineers shipping a release every two weeks, by running sprint planning, refinement and retrospectives.
- Turn client escalations and production usage data into roadmap priorities, fixing recurring problems at the root rather than one ticket at a time.

Product Specialist

10/2024 – 03/2026

- Cut SME loan approval from 60 to 20 days (~67%), by prioritising automation of manual steps in the credit workflow with bank risk and credit teams.
- Reduced analyst time per credit assessment by ~50%, by defining an AI feature that reads financial statements and buyer-seller ledgers and drafts the financial analysis for review.
- Took new bank clients from contract to go-live in 1–3 months, by running onboarding and UAT and writing the functional and technical documentation.

msg global solutions, Serbia

12/2022 – 10/2024

SAP consulting • enterprise finance software

Product Owner — SAP Profitability & Performance Management

05/2023 – 10/2024

- Delivered the corporate direct tax module on a flagship SAP Germany programme, as one of three Product Owners on a 50-person team working with globally distributed teams.
- Co-led the SAP SCT starter pack, reused across 3+ client implementations, by standardising calculation logic into a reusable product.
- Drove PaPM adoption across 100+ enterprise stakeholders, by running demos, UAT and cross-workstream coordination.

IT Consulting Intern

12/2022 – 05/2023

- Promoted to Product Owner within 6 months while supporting senior consultants on SAP implementations.

Sistem:i d.o.o., Belgrade

10/2020 – 12/2022

Apple Solution Expert

Sales Manager

- Closed €200K+ in software sales to institutional clients, by owning the full cycle from solution demo to close.
