## LANGUAGES

Serbian (Native)  
English (Full Professional)

Product Owner with nearly 6 years of professional experience across enterprise SAP and AI fintech, 3+ years of it in product roles. Owns roadmap, release planning and stakeholder alignment for Selecta, an AI-driven CRM whose client base is roughly 90% banking — directing a 10+ engineer team and leading 3 Product Specialists. Defined and shipped the AI features that cut SME loan approval from 60 days to 20. Previously one of three Product Owners on a 50-person SAP Germany engagement.

## KEY ACHIEVEMENTS

- Cut SME loan approval turnaround by 67% — from 60 days to 20 — by prioritising automation of the manual steps in the credit workflow, shifting analyst time from mechanical processing to judgement work.
- Defined and shipped an AI document-intelligence capability that reads financial statements and buyer-seller ledgers and drafts financial analysis and commentary, replacing a manual step in credit assessment.
- Promoted twice in four years — intern to Product Owner at msg global, then Product Specialist to Product Owner at Intellya, now leading 3 Product Specialists.

## PROFESSIONAL EXPERIENCE

### Intellya d.o.o., Belgrade

10/2024 – Present

AI products for financial services

#### Product Owner

03/2026 – Present

- Owns roadmap, release planning and stakeholder alignment for Selecta, an AI-powered CRM pairing a 360° customer view with predictive analytics; ~90% of its client base is banking, including tier-1 Serbian banks.
- Directs a cross-functional team of 10+ engineers, running sprint planning, backlog refinement and retrospectives; assigns and reviews the work of 3 Product Specialists.
- Writes user stories and acceptance criteria grounded in first-hand SQL analysis across production databases and Bold BI dashboards; prototypes in n8n and Claude Code before committing engineering capacity.

#### Product Specialist

10/2024 – 03/2026

- Owned end-to-end delivery of AI-driven features in SME lending, from discovery and prioritisation through go-to-market.
- Cut SME loan approval turnaround by 67% — 60 days to 20 — by prioritising automation of manual steps in the credit workflow.
- Led product definition for an AI capability that ingests financial statements and buyer-seller ledgers and generates draft financial analysis and commentary.
- Authored technical and functional documentation and ran customer onboarding to accelerate adoption.

### msg global solutions, Serbia

12/2022 – 10/2024

Enterprise software • SAP

#### Product Owner — SAP PaPM

05/2023 – 10/2024

- One of three Product Owners on a 50-person team delivering SAP Profitability and Performance Management (PaPM) on a flagship SAP Germany engagement.
- Owned the corporate direct tax module and co-led delivery of the SAP SCT starter pack.
- Managed backlog and release plans and wrote user stories and acceptance criteria for globally distributed teams; ran ceremonies and cross-workstream dependencies.
- Drove PaPM adoption across 100+ enterprise stakeholders.

#### IT Consulting Intern

12/2022 – 05/2023

- Supported senior consultants on SAP implementation engagements; promoted to Product Owner after six months.

### Sistem:i d.o.o., Belgrade

10/2020 – 12/2022

Apple Solution Expert

#### Sales Manager

- Generated €200K+ in software sales, owning the full cycle from solution demo to close for institutional clients.
- Two customer-facing years that built the product sense — user needs, market dynamics, competitor positioning — later applied to product ownership.
